PROFESSIONAL SUMMARY

Senior Software Engineer and Technical Lead with 9+ years of experience architecting and delivering enterprise SaaS, ERP, and FinTech platforms. Known for cutting a 12-second API to under 1 second, building queue pipelines processing 40,000+ records, and leading cross-functional teams of 8+ engineers. Combines deep backend expertise with a strong product mindset — focused on systems that scale, stay reliable, and genuinely solve business problems.

TECHNICAL SKILLS

Backend	PHP 8+, Laravel 11+, REST APIs, Queue Workers, Microservices, Event-Driven Architecture, SOLID Principles
Frontend	React.js, Livewire, Inertia.js, Alpine.js, Tailwind CSS, JavaScript ES6+, jQuery, Bootstrap
Database	MySQL, PostgreSQL, Redis, Memcached, Query Optimization, Indexing, Schema Design
DevOps	Docker, AWS (EC2, S3, RDS), CI/CD Pipelines, Nginx, Linux Ubuntu, Deployment Automation
Tools	Git, GitHub, GitLab, Jira, Postman, PhpStorm, VS Code, Cursor, TablePlus, DBeaver
AI Dev	Claude AI, GitHub Copilot, Cursor AI, ChatGPT, Ollama — Prompt Engineering & Code Generation

PROFESSIONAL EXPERIENCE

Software Specialist

Oct 2023 – Present

SSL Wireless · Dhaka

- Reduced API response time from 12s to under 1s (90%+ improvement) via Redis caching, indexing, and query rewriting
- Designed queue-based background pipeline processing 40,000+ records reliably at scale
- Built high-throughput backend services for large-scale transaction and operational workflows
- Introduced Docker-based deployment workflows, bringing dev and production into full environment parity
- Delivered production releases in close collaboration with product, QA, and cross-functional teams

Software Engineer → Technical Lead

Aug 2016 – Sep 2023

Japan MDB Co. Ltd. · Dhaka

— Technical Lead (Jan 2020 – Sep 2023)

- Architected and delivered scalable multi-tenant SaaS platforms for enterprise clients
- Led sprint planning, technical estimation, and architecture reviews across multiple concurrent projects
- Mentored 5+ engineers; enforced PSR-12 standards through code reviews, raising team-wide code quality

— Senior Software Engineer (Jan 2018 – Dec 2019)

- Developed and optimized backend systems and REST APIs for enterprise-scale applications
- Improved performance through intelligent database design, query tuning, and caching strategies

— Software Engineer (Aug 2016 – Dec 2017)

- Built backend services powering web and mobile integrations
- Explored real-time integrations and computer vision features using OpenCV

Junior Software Engineer

Apr – Jul 2016

Daffodil Japan IT Ltd. · Dhaka

- Customized PrestaShop eCommerce solutions; built responsive WordPress themes including news portals
- Translated PSD mockups into pixel-perfect, cross-browser compatible web pages

KEY PROJECTS

Enterprise ERP & Workflow Management System

- Architected a scalable multi-tenant ERP covering inventory, warehouse, LC management, booking, PI processing, and advanced reporting
- Optimized complex queries and caching strategies to deliver sub-second dashboard performance at enterprise scale
- Developed custom import/export, LC, and operational workflow features for an international trading company

Virtual Recharge System — FinTech Platform

- Built a high-volume transaction engine with secure recharge workflows, trigger validation, and real-time monitoring
- Implemented async CSV import/export using Laravel Queues & Jobs — processing large datasets without blocking the main thread
- Delivered real-time operational dashboards with optimized API responses and Redis caching for large-scale data

Spectrum Pro — Business & Jira Dashboard

- Built an enterprise SDLC tracking platform bridging business stakeholders and engineering teams
- Engineered automated workflow stage transitions with real-time Jira API sync for tasks, sprints, and project updates
- Developed resource management and cost-tracking modules for workload visibility across teams

BeeNoor — SaaS ERP Ecosystem (In Progress)

- Designing a full-suite SaaS ERP platform for the Bangladeshi market — modules: ERP, POS, HR, CRM, School, Inventory, WMS
- Built on Laravel + Livewire (web) and Flutter (mobile), with an AI assistant named Noor integrated at the core

EDUCATION

B.Sc. in Business Information Technology

2017

University of Greenwich, UK · **First Class Honours**

CERTIFICATIONS & ACHIEVEMENTS

Code Generation with Generative AI — Simplilearn Skill Up	June 2026
Advanced Prompt Engineering — Professional Development	June 2026
Claude AI Fundamentals — Anthropic	June 2026
SQL Query Optimization / Database Fundamentals — Simplilearn	June 2026
Cybersecurity Leadership — Professional Certification	June 2026
Introduction to Cybersecurity — Cisco Networking Academy	April 2026
Cyber Hygiene & Digital Security — The Asia Foundation	April 2026
Hacker Rank: 150+ Active Problem-Solving Challenges	Ongoing
Agile Bangladesh Conference — DIIT	2015
