PROFESSIONAL SUMMARY

Senior Backend Engineer and Technical Lead with **9+ years of professional experience** building scalable SaaS, ERP, FinTech, and enterprise workflow systems using Laravel and modern backend technologies.

Specialized in high-performance API architecture, database optimization, queue-based processing, Redis caching, and scalable cloud deployments. Proven track record of reducing API latency by **over 90%**, **designing enterprise-grade** multi-tenant systems, and leading cross-functional engineering teams to deliver reliable production solutions at scale.

Strong expertise in **Laravel, MySQL optimization, Redis caching, and cloud-based deployments**, with hands-on experience collaborating across teams to deliver reliable, production-grade solutions.

TECHNICAL CORE COMPETENCIES

- **Backend:** PHP (Laravel 11+), CodeIgniter (familiar), REST APIs, Microservices Architecture
- **Frontend:** React.js, JavaScript (ES6+), jQuery, Ajax, HTML5, CSS3, Bootstrap, Tailwind CSS
- **Databases & Performances:** MySQL, PostgreSQL, Query Optimization, Indexing, Redis
- **DevOps & Cloud:** Docker, AWS (EC2, S3), CI/CD, Linux (Ubuntu/Kali)
- **Development Tools:** ChatGPT, GitHub Copilot, Ollama, Cursor, Antigravity and Open Code

PROFESSIONAL EXPERIENCE

Software Specialist – SSL Wireless (Dhaka, Bangladesh)

Oct 2023 - Present

- Reduced API response time from 12s → <1s (90%+ improvement) using indexing and Redis caching
- Designed scalable backend systems handling large datasets
- Processed 40k+ records using queue-based architecture
- Introduced Docker for consistent deployment environments
- Collaborated with cross-functional teams for production delivery

Software Engineer to Technical Lead – Japan MDB Co. Ltd. (Dhaka, Branch)

Aug 2016 – Sep 2023

Technical Lead (Jan 2020 – Sep 2023):

- Led a cross-functional team (Engineering, Design, Product) to deliver scalable SaaS platforms.
- Mentored developers and enforced coding standards, improving overall code quality.

Senior Software Engineer (Jan 2018 – Dec 2019):

- Developed and optimized backend systems and APIs for enterprise applications.
- Improved performance through efficient database design and query optimization.

Software Engineer (Aug 2016 – Dec 2017):

- Built backend services integrated with web and mobile applications.
- Worked on real-time integrations and explored computer vision use cases (OpenCV)

- Developed and customized eCommerce solutions using Presta Shop
- Built and modified WordPress themes, including news portal-style websites
- Translated PSD designs into fully functional, cross-browser compatible web pages

Provisional IT Officer - Daffodil Institute of IT (Part-Time), Dhaka. Bangladesh. Jan 2015 - July 2016

- Completed various projects, including global recruitments and the institute required system.
- Made significant contributions through the websites based on specific requirements.
- Implemented responsive UI using HTML5, CSS3, and JavaScript

ACADEMIC QUALIFICATIONS

- | | |
|--|------|
| • B.Sc. in Business Information Technology - University of Greenwich, UK (1st Class) | 2017 |
| • Higher Secondary Certificate (HSC), GPA: 4.50/5.00 — MAD, Dhaka Board | 2009 |
| • Secondary School Certificate (SSC), GPA: 4.83/5.00 — KDM, Jessore Borad | 2007 |

CERTIFICATIONS & TRAINING

- Cyber Hygiene Training — The Asia Foundation (2026)
- Agile Bangladesh Conference — DIIT (2015)
- Annual Debate Workshop, Day Long Workshop on — Debate Bangladesh Organizer (2007)
- Leadership Expertise with small team and seminar event about the ICT workshop.
- Active problem solving (Hacker Rank: 150+ problems solved)

LANGUAGES

- English - Advanced
- Arabic - Read and Write
- Bangla – Native

KEY CONTRIBUTIONS

Enterprise ERP & Workflow Management System

- Architected and developed a scalable multi-tenant ERP solution using Laravel, covering marketing, inventory, warehouse, workflow automation, LC management, booking, PI processing, and advanced reporting modules.
- Implemented secure Role-Based Access Control (RBAC) and tenant-level data isolation for enterprise-grade multi-client architecture.
- Optimized complex database queries, caching strategies, and API performance to deliver high-speed dashboard analytics and reporting.
- Designed and maintained RESTful APIs, reusable service layers, and modular backend architecture following clean code principles.
- Developed custom ERP features for an international trading company, including LC, booking, import/export, and operational workflow management.

Virtual Recharge System (FinTech)

- Developed a high-volume FinTech transaction processing system with secure recharge workflows, trigger amount validation, and transaction monitoring.
- Implemented asynchronous CSV import/export processing using Laravel Queues & Jobs, improving system efficiency and background task handling.
- Built real-time operational dashboards with optimized API responses, caching, and performance tuning for large-scale transaction data.
- Enhanced system reliability and scalability through queue management, database optimization, and error-handling strategies.
- Developed a service-based recharge platform integrating multiple banking and online payment services for seamless digital transactions.

Spectrum Pro – Business & Jira Dashboard

- Developed an enterprise-grade business process and SDLC tracking platform to streamline communication between business stakeholders and engineering teams.
- Engineered a real-time workflow management system with automated stage transitions, improving project visibility from pre-sales to delivery.
- Integrated Jira APIs for real-time synchronization of tasks, sprint updates, and project workflows across teams.
- Built scalable backend services, reporting modules, and dashboard analytics using Laravel best practices and API-driven architecture.
- Developed an internal project and resource management system for tracking project inflow/outflow, developer workload distribution, and operational cost calculations.
